

BRUSH

THE GKB BRUSHES WERE DESIGNED WITH THE PURPOSE OF BRUSHING ARTIFICIAL TURF FAST AND EASY. BRUSHING ARTIFICIAL TURF IS AN ESSENTIAL PART OF THE WEEKLY MAINTENANCE. BY USING THE GKB BRUSH (BR), QUICK-BRUSH (QB), T-BRUSH (TB) OR ROTOBRUSH (RB) ON YOUR SPORTS FIELD, THE ARTIFICIAL TURF WILL REMAIN IN TOP-CONDITION.

THE GKB BRUSH IS THE LARGEST BRUSHING MACHINE IN THE RANGE OF GKB.

THE BR-400 HAS HYDRAULICALLY RETRACTABLE SIDE BRUSHES, SO THE MACHINE CAN BE EASILY TRANSPORTED AND STORED.

REGULAR BRUSHING OF FIELDS PREVENTS IMPAIRED DRAINAGE, DETERIORATING TECHNICAL CHARACTERISTICS BY HARDENING AND THE IMAGE OF A POLLUTED FIELD. THE BRUSHED FIELDS WILL HAVE THE SAME APPEARANCE AS ON THE DAY OF COMMISSIONING.

BRUSH

BR-200

- WORKING WIDTH: 2 MTR
- DIMENSION: 1,2x2,0x1,0 (LXWXH)
- WEIGHT: 190KG
- POWERCONSUMPTION: 20-45 HP
- LINKAGE: STANDARD 3 POINT CAT I-II

BR-400

- WORKING WIDTH: 4 MTR
- DIMENSION USING/TRANSPORT: 1,2x4,0x1,0 / 1,2x2,0x1,4 (LXWXH)
- WEIGHT TOTAL: 400 KG
- POWERCONSUMPTION: 35-50 HP
- LINKAGE: STANDARD 3 POINT CAT I-II
