

DRAINMASTER

THE GKB DRAINMASTER IS THE PERFECT MACHINE FOR ENSURING EXCELLENT DRAINAGE OF THE TOPSOIL. THE DRAINMASTER ACHIEVES THIS BY DIGGING 2 OR 3 TRENCHES, REMOVING THE SOIL, FILING THE TRENCHES WITH SAND AND THEN COMPACTING THE SAND. THE MILLED SOIL CAN OFTEN BE USED AS A DRESS GROUND.

THE DRAINMASTER CAN CREATE TRENCHES UP TO 23 CM DEEP, AND FILL THEM WITH DRAINSAND. THE WHEELS ARE ALIGNED TO COMPACT THE SAND EVEN MORE. DURING TRANSPORT THE WHEELS CAN BE LOWERED SO THAT THE BLADES NO LONGER TOUCH THE GROUND.

ON GOLF COURSES AND SPORTS FIELDS WHERE SURFACE WATER IS CAUSING A PROBLEM, THE DRAINMASTER THE SOLUTION. THE CREATED STRANDS ENSURE FASTER DRAINAGE WHICH ENSURES A HIGHER PLAYING CAPACITY. BY MILLING THE FIELD IT CAN BE PERFECTLY LEVELLED AND CLEANED IF NECESSARY, TO KEEP THE SYSTEM FUNCTIONING OPTIMALLY.

DRAINMASTER

DM-150

- WORKING WIDTH: 1,5 MTR
- WORKING DEPTH: MAX. 23 CM
- DIMENSIONS OPERATION/TRANSPORT: 4,5x3,9x2,6 / 4,5x2,6x2,6 MTR (LXWXH)
- WEIGHT: 3300 KG (EMPTY)
- CAPACITY SANDHOPPER: 4,0 M³
- POWERCONSUMPTION: > 120 HP (+ CREAP GEARBOX)
- LINKAGE: STANDARD 3 POINT CAT II
- 1X DOUBLE ACTING HYDRAULIC VALVE / DEPTH ADJUSTEMENT BUCKLING DRAWBAR (20 L/MIN)
- 2X DOUBLE ACTING HYDRAULIC VALVE / CYLINDER SIDEBELT AND BOGIE (20 L/MIN)
