

# ECODRESSER

THE GKB ECODRESSER IS DESIGNED TO DRESS AND AERATE TURF BOTH ECONOMICALLY AND ENVIRONMENTALLY IN A SINGLE PASS DURING YEARLY MAINTENANCE. BECAUSE THE ECODRESSER RE-USES THE EXISTING SURFACE AS DRESS GROUND, THE PURCHASE OF EXPENSIVE SOILS IS NO LONGER NECESSARY. THE ECODRESSER IS DESIGNED FOR SPORTS TURF, BUT IS ALSO SUITABLE FOR PARKS AND GOLF COURSES.

THE STANDARD MODELS ARE EQUIPPED WITH A SAFETY CLUTCH AND SPRING MOUNTED COULTERS, TO PREVENT DAMAGE BY STONES FROM THE SURFACE. IN ADDITION THE ECODRESSER CAN BE EQUIPPED WITH A STONE SCREEN, TO SIEVE OUT THE STONES BEFORE THEY CAN DO ANY HARM.

THE ECODRESSER IS SPECIALLY DESIGNED FOR SPORTS FIELDS, BUT THE MACHINE IS ALSO IDEAL FOR GOLF COURSES AND PARKS. THE WORKING PROCESS ENSURES GOOD OVERSEEDING CONDITIONS, AND INTENSIVE AERATION AND IMPROVED DRAINAGE SO THAT THE EXISTING ROOTS CAN BETTER DEVELOP.
