SANDFILLER

THE SANDFILLER IS DESIGNED TO COUNTER THATCH ON GOLF COURSES AND ESPECIALLY THE GREENS. BECAUSE THE TOP LAYER IS SCARIFIED AND OPTIONALLY FILLED WITH SAND, IT CREATES A GOOD AERATION AND DRAINAGE OF THE FIELD.

THREE HEIGHT-ADJUSTABLE LOAD-BEARING ROLLERS ALLOW FOR THE MACHINE TO FOLLOW THE CONTOURS OF THE SURFACE. THE (COMBI-) ROTOR CAN BE FOUND BETWEEN THESE ROLLERS, AND CAN BE USED TO SCARIFY AND FRASE MOW.

THE DRIED SAND IS DEPOSITED IN THE FUNNEL SHAPED BUNKER. THE SAND INLET IS HYDRAULICALLY CONTROLLED BY AN ADJUSTABLE CONTROL VALVE ON THE SIDE OF THE MACHINE. THE EXCESS MATERIAL, OBTAINED FROM SCARIFYING OR MOWING THE TOP LAYER, IS COLLECTED IN A LATERAL TILTING BIN.

SANDFILLER

SF-120

- Workingwidth: 1,2 MTR

- Working depth: 2 cm 3 cm 4 cm

- SAND CONSUMPTION: $0,200 \text{ m}^3 / 100 \text{ m}^2$ $0,275 \text{ m}3 / 100 \text{ m}^2$ $0,350 \text{ m}3 / 100 \text{ m}^2$

- DIMENSIONS OPERATION/TRANSPORT: 1,6x1,8x1,2 MTR (LXWXH)

- WEIGHT: 620 KG (EMPTY)

- CAPACITY SANDHOPPER: 120 LITER

- CAPACITY COLECTORBOX: 400 LITER (+ CREAP GEAR)

- Powerconsumption: > 45 HP

- LINKAGE: STANDARD 3 PUNT CAT I

- 1x double acting hydraulic valve / sandbelt (20 L/MIN)
